The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim1-12 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are vague and indefinite in that the average diameter is related to the smallest element with no further explanation as to what part (e.g. dimension) of the element, or how it is related to the element. Is it, for example related to the smallest of dimention of the element as stated in applicants claimed 13??

Cclaims 1-29 are rejected under 35 USC 103 (a) as being unpatentable overBaumoel in view of Davidsen for the specific reasons noted in the previous office action (4-21-05)).

Applicant argues that he particle sizes selected b Baumoel are not specifically related to the dimensions of the piezoelectric elephant. However, according to applicants claims, the smallest dimension for Baumoels would have to be less than 100 μ in order to not meet the terms of the claim. That is to say, Baumoel cannot have any convention greater than 100 μ without meeting the claimed criteria. Although, drawings are not necessarily to scale, by inspection (noting that the metalparticles are described as a powder), and taking into consideration the dimensions necessary for typical ultrasonic flowmeter, the smallest dimention of Boemals piezoelectric element would be

considerably larger than 100 microns. Thus, it is felt that the position of Baumoele would result in a back that with me and the criteria set forth in applicants claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
